

Policies

Introduction

Welcome to the Internet version of the Government of the Northwest Territories Policies Manual. This on-line version of the manual is virtually identical to the official printed version, apart from some minor formatting differences that arise when documents are placed onto the Internet.

The Government of the Northwest Territories Policies Manual is a compilation of policies approved by and issued on the authority of the Executive Council of the Government of the Northwest Territories (GNWT). These policies represent the GNWT's commitment to the public to follow an action or course of action in pursuit of approved objectives.

Organization

The policies in the manual are organized by government department and by policy number. Once a number is assigned to a policy, that policy number will not be reissued even if the policy is rescinded.

Distribution

The Policies Manual is distributed to senior managers of the GNWT, selected libraries and the offices of some non-government agencies. Copies of original signed policies are available from the offices of the deputy ministers of the government departments responsible and from the Cabinet Secretariat.

Manual Updates

Policy amendments will be distributed to manual holders on a periodic basis. It is the responsibility of the manual holders to ensure that their manuals are kept up to date.

Further Information

To obtain further information regarding a policy included in this Manual, contact the government department responsible for the policy or:
